

Designer

We are currently looking to recruit for the above position to strengthen the existing Engineering Management group and improve the integration and delivery of both body and chassis engineering tasks.

Reporting to the Engineering Manager the role will be responsible for developing new and maintaining existing designs. Duties include:

- Performing assignments requiring the use and application of engineering principles with direction from an engineer.
- Completing projects and release technical packages within the product development guidelines to product performance requirements, cost, and schedule.
- To concurrently design and specify cost-effective components and systems for our product range from concept through field
- To accurately document and maintain product design through detailed prints and bills of material according to current engineering standards in the automotive industry

We are looking for:

- Minimum HNC in Mechanical Engineering or a related discipline
- Experience in using Solidedge design software or similar
- Good level of IT literacy – MS Office
- Excellent verbal and written communications to internal and external customers, organizational skills, and problem solving.

Closing date: 13 January 2012

Please send a CV and Covering letter, stating which position you are applying for to: chassis.hr@alexander-dennis.com

Previous Applicants need not apply

Please note that due to the volume of applications we will only be able to contact shortlisted applicants. If you have not heard from us within 2 weeks of the closing date then you should assume your application was unsuccessful on this occasion.
