

SIMPLY THE BEST

...but don't just take our word for it!

“ We've just won a four-year contract from Local Link to provide services between Burtonport and Letterkenny. The Enviro200 fitted the tender specification exactly and in the end it was a no brainer. We went from talks to delivery in a matter of weeks.”

Brian Ó Dónaill,
Transport Manager,
Bus Feda.

“ We run our high capacity Enviro400 between Ratoath, Ashbourne and Dublin City Centre. It has leather seats, wood effect flooring, tables, Wi-Fi and USB charging points, stop buttons and mobile phone holders at every seat, roof skylights and a sophisticated passenger information system. It is the finest double deck available on the market, not only an operator's dream but a passenger's delight. The bus has a daily dispatch rate of over 99% and the support is unrivalled. In our eyes a product from ADL is a money-maker.”

Damien Hughes, Director,
Ashbourne Connect.

“ Our latest contract win runs between Ballaghaderreen and Sligo. The Enviro200's reputation speaks for itself, particularly in terms of specification and performance but timing was also critical in this negotiation. ADL had a 10.8m model available from stock and it was delivered, ready for service, in less than two weeks.”

Aiden Furey, Director,
Furey's of Sligo.

“ We recently introduced a new low entry, Euro 6 Enviro200 carrying passengers between Fanod and Letterkenny. Having been at the heart of this community for almost 70 years it's important we play a role in sustaining the local economy, particularly on rural routes that others may find marginal. The Enviro200 is tailor made for the job in terms of capacity, passenger appeal and reliability.”

Francis Marley, Director,
Marley Travel.

In the drive towards greener, low entry vehicles and the need to extend routes into rural areas, more and more operators are turning to the Enviro range from Alexander Dennis Limited (ADL).

Bus Feda, Furey's of Sligo, Marley Travel, Wexford Bus, Go-Ahead Ireland and Ashbourne Connect are just some of the renowned names to have recently put their faith in ADL's Enviro200 and Enviro400 models.

Both vehicles are trailblazers in terms of style, passenger capacity, accessibility, low emission technology, manoeuvrability, safety and passenger-centric features, all backed by best-in-class aftermarket support.

Add to that immediate availability and it's little wonder the Enviro range is emerging as the number one choice.
